of exhibitors achieved their exhibiting objectives

Exhibitor feedback

"As a first-time exhibitor, I can say this is an outstanding exhibition. We specialize in supplying diesel specific core components all over the world. At ReMaTec we have met new buyers from China, Dubai, and Europe that are interested in purchasing material from us in the coming weeks. It makes more sense for us to exhibit at ReMaTec with its specialty in remanufacturing than some of the larger aftermarket shows. We will definitely be back!"

Justin Greenberg, Chief Executive Officer, DieselCore

"At ReMaTec, the visitors we meet are real specialists compared to other aftermarket industry exhibitions. It is nice to explain in-depth technical features to these experts. Overall, we find the highest quality of visitors at ReMaTec. So, compliments to the organisers of ReMaTec 2017, a good job has been done!"

Davide Maraffino, Chief Executive Officer, EMMETEC & ORPAV

"We are back at ReMaTec 2017 after 10 years and the show has been surprisingly positive for us. Our aim was to meet new buyers and we've met a lot of SME's who are in remanufacturing of engines and also bigger companies specialised in parts. All in all, which is a new perspective for us with new leads that will be very promising. We are not waiting another 10 years till the next ReMaTec, as we've already confirmed our booth for ReMaTec 2019!"

Jarek Mieszkowski, Managing Director, Sunnen Polska

"ReMaTec was very good this year. Lots of energy, good attendance. We felt that we did very well and we have signed up for next time."

Saul Goldfarb, President, Goldfarb & Associates, Inc.
